

THE MUSEUM EXPERIENCE

SensyTouch Brings Added Depth with Multi-Touch Solutions

Few things enhance a museum's collections, displays and exhibitions as does increased interaction and accessibility to information through the use of SensyTouch all-in-one multi-touch systems and solutions.

Museums have broadened their roles in society, growing in sophistication of exhibits and outreach to the public. Technology is part of the museum experience nowadays. SensyTouch puts museums on the cutting edge with multi-touch solutions that engage museum-goers.

SensyTouch allows museum information to be presented in a new way. Imagine visitors with easy access to detailed information on current exhibits, future exhibits, lectures, a photo gallery of past exhibits, membership information, donor information, the museums history and mission—even facility rental or nearby dining and shopping. Catalogs and museum floor plan of exhibits can be part of the interactive multi-touch solution.

SensyTouch allows visitors to dig deeper into exhibit background—biographies of an artist, the comparative sizes of dinosaurs or the history of an archeological find. The information can be at their fingertips—engaging many visitors at the same time.

THIN OUTSIDE. POWERFUL INSIDE.™
